Don't sabotage your breastfeeding success

## NIPPLE CONFUSION

The phrase every parent who switches between breastfeeding and bottle feeding fears

[READ THE BLOG POST](#)

Dear Stephanie

It's the phrase every parent who switches between breastfeeding and bottle feeding fears - *nipple confusion*! After all, if a mother has fought hard to successfully breastfeed her baby, the last thing she wants is to introduce a bottle to make life a little easier for everyone in the family only to find that Bub is no longer happy to breastfeed.

Thankfully, Minbie nipples are specifically designed to support your baby's instinctive breastfeeding motion and latch and this significantly reduces the likelihood that your baby will develop a preference for bottle feeding - but only if Minbie is the first and only nipple

you use.

Read all about [how Minbie helps families combat nipple confusion](#) and make sure you read to the end of that blog post so you **don't miss out** on our tips for supporting and protecting your (or your partner's) supply of breast milk.

### *What's coming up next?*

There's a sinister substance that may be causing your baby pain and causing you to have to feed Bub more regularly. Want to know what it is and how to get rid of it? Look out for my **next email** and I'll tell you all about it.

Best wishes

*Julia*
